

Week Three - Home Learning Year 3

These are extra Maths, English and Reading activities that you can do but don't have to.

Writing Task 2:

Think of as many examples of these as you can:

- 1) Words and phrases that persuade you
- 2) Exciting sentence openers

You could use examples from writing you have already done or use any of the books you have been reading!

We will make a list of Year 3's ideas for your own persuasive writing so please send us any ideas you have!

Reading Task 2:

Find a recipe online or in a book that excites you! *Ask an adult if you can make it together.*

Remember to **read the instructions carefully** so you know:

- 1) Which ingredients you need and how much
- 2) Any equipment you might need
- 3) What you need to do and how you need to do it

Maths Task 2:

Keep practising your times tables on times table rockstars!

Try challenging your friends to a game!

Writing Task 3:

Write your own story similar to *The Boy Who Switched Off The Sun*.

- 1) How is your story similar?
- 2) How have you changed the story?
- 3) Read your story out loud to a family member and get them to copy you (echo-reading)!

Remember :

- Capital letters, full stops, commas (Aa . ,)
- Conjunctions (*but, because, then, so, if*)
- Powerful adjectives (*describing words*)

Reading Task 3:

Find and read as many food and drinks packages as you can. Look for this picture which is usually on the front.

The coloured bars tell you how much salt, fat or sugar is in the food or drink.

Red bar = high Orange bar = okay

Green bar = low

See which foods in your house have red, orange or green bars.

Maths Task 3 - Adding fractions:

1) Add the numerators (top) together.

2) The denominator (bottom) stays the same.

If both numbers are the same number, we can write it as 1 whole number.

Example: $\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$ $\frac{1}{3} + \frac{2}{3} = \frac{3}{3}$ or 1

Mild $\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$ $\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$ $\frac{2}{5} + \frac{2}{5} = \frac{4}{5}$

Medium $\frac{2}{5} + \frac{1}{5} = \frac{3}{5}$ $\frac{2}{6} + \frac{3}{6} = \frac{5}{6}$ $\frac{2}{4} + \frac{2}{4} = \frac{4}{4}$

Spicy - Which one of these fractions is larger?

Explain your answer. $\frac{1}{5} + \frac{4}{5} = \frac{5}{5}$ $\frac{2}{5} + \frac{3}{5} = \frac{5}{5}$

Please ask an adult before using the internet for any research.
