

Week Three - Home Learning Year 3

Please make sure that your child is completing work daily. Any completed work can be emailed to the teacher and they will be given feedback. Work can be sent over via pictures or email attachments.

Writing Task:

Read the example of a persuasive letter.

Now look at the list of features underneath the persuasive letter and highlight or copy all of the examples you can find. This could be done on paper or a computer.

Challenge: Make a key for the features you find using different colours.

Reading Task:

Read *The Boy Who Switched Off The Sun*.

- 1) Why did the boy switch off the sun?
- 2) What kind of ending did this book have?
- 3) What was the moral (lesson) of the story?
- 4) Choose 3 words from the story that you might find tricky and explain them.

Use these strategies to help you understand the meaning: read the rest of the sentence, break it down into smaller parts, think of similar words, say it in a different way.

Maths Task:

Have a look at the maths PowerPoint. Read it through and check you understand how to do it.

Then try the questions!
If you can't print them, you can always copy them onto paper or just show your working out/answer on the paper.

Remember that you can complete mild, medium, spicy or a mix of each!

Creative Task:

Sketch one or more of these 3D shapes.

Cylinder Cube Rectangular Prism Sphere Pyramid Cone

Remember to use your pencil lightly at first. Once you're happy with your sketch, you can go over it with darker lines to add different shades of light and dark.

Challenge: Add a shadow to your shape! If you're not sure, try to find a similar shape in your house and shine a torch on it to see the shadow.

Topic Task (UK countries and cities):

On purple mash, there are two quizzes for you to try about the countries and cities in the UK.

You can use the map of the UK to help you.

Challenge: If you know where all the countries and cities are and you still want a challenge, try the UK counties quiz on purple mash next.

Purple mash → topics → geography → maps
→ English counties.

Science Task (Healthy Bodies):

Follow this link and explore the guide:

<https://www.nhs.uk/live-well/eat-well/the-eatwell-guide/>

On the Science sheet, circle the food in the correct colour to show which group they belong in. You can do this on paper/computer or make lists of the foods in each group.

Green - Fruit and Vegetables Blue - Dairy Products
Red or pink - Proteins Purple - Oils and Spreads
Orange or yellow - Carbohydrates
Black or brown - High in fat, salt or sugar

Challenge: Make a poster to show why one or more of the food groups are an important part of our diet.

Please ask an adult before using the internet for any research.
