

## Year R/1 Home Learning Menu Summer Term 2

With your child you can 'dip into' any of the activities on the sheet. Your child can present their learning in any way they would like and bring in their pieces of work any time during the half term to share with the class

### Get writing:

Do you know the features of a plant? Do you know about the life cycle of a plant?

Why not draw and label a plant using your phonic knowledge to help you? You could also extend this further by creating a life cycle of a plant and adding labels or sentences to describe each stage.

### Get mathematical:

Things to continue practising each week include counting in 2's, 5's and 10's and quick fire number bonds to 10 and then 20.

Fancy a maths challenge? If you are growing your own seeds, keep a simple diary of the time it takes them to grow. Include writing the days of the week and then use your counting skills to identify the number of days and weeks it took to grow.

### Get reading:

If I wanted to learn more about plants, growing and changing, where could I look? That's right in non-fiction texts or on the internet.

Do you have any non-fiction texts at home? If you do share them with a grown up and record facts or ask if you can bring the book in so we can all learn more about plants together!

### Get investigating:

How do seeds grow? What happens if seeds do not have the correct conditions to grow in?

You can research plants growing using the internet or you could plant your own seed and change a variable. For example, what happens if you do not water your seeds? Record this in any way you like.

### Get physical:

During remote learning, the children loved the weekly exercise challenges! We have continued this in school as they enjoyed it so much. How many times can you complete each activity in 1 minute?

- Star jumps
- Squats
- Burpees
- Push ups

### Get creative:

Can you create your own wonderful masterpiece? You could create an idea below or use your own imagination instead:

- A life cycle of a plant
- Paint a picture of a pretty flower.
- Take pictures of plants and flowers you see when you are out and about.
- An idea of your own ...

Remember to ask an adult whenever you are using the internet to help you to stay safe!
